AUDITION TEXT

SUPERMAN Speech

I am Superman. I am from the planet Krypton. Our planet was dying and as a Baby, my parents put me in an escape pod to save me. I crash landed in the town of Smallville and was found by Martha and Jonathan Kent. They Adopted me as their own, gave me a new name and instilled in me their strong moral values. When I later grew in to the full extent of my powers I moved to Metropolis and became Superman, and now I live there as a reporter for the Daily Planet known only as Clark Kent, whilst keeping my identity a secret, always ready to answer any cry for help as Superman.

I have superhuman strength, stamina, and speed, as well as X-ray, heat, microscopic, and telescopic vision. I can fly and am invulnerable to any weapon. But I must always be aware of radioactive fragments of the planet Krypton that have fallen to Earth. You'll know them as krytonite. If I am exposed to these it will weaken me and eventually could kill me.

I just want to live as part of humanity, helping whenever my powers can. I am determined to live my life not as a figure isolated from humankind but as a man existing within it.
